

What makes Ziptrak® Unique?

Operating blinds can be a cumbersome and time consuming task, Ziptrak® track guided blind system takes out all the hard work, leaving you with perfect shade, wind and UV protection and an elegant blind that will enhance the look and feel of your structure; home or business.

Ziptrak® track guided blind system has specially designed slotted tracks in which the blind glides smoothly and easily, stopping at any position. The blind can be secured and locked in the down position to guard against high winds and UV – no zippers or buckles required, it's that simple. To protect your verandah or patio from wind and rain while continuing to enjoy the view, use clear or tinted PVC.

To communicate your brand, signage applied directly to the blind is a great way to increase business visibility whilst supplying your customers with shade for a pleasurable experience. Components are carefully sourced, designed and manufactured in-house to result in the highest quality product that delivers a superior and trusted solution for commercial, retail and residential customers.

New Centre Lock release

Your Ziptrak® blind glides smoothly and easily, stopping and holding at any position without the need to lock it!

Simple to Operate Our new Central Lock Release makes it even easier. Simply push the Ziptrak® blind down to lock it in the down position!

All Weather Protection Lock your Ziptrak® system in the down position to guard against high winds and UV rays. To unlock, simply pull the handle up!

Café Blinds

Café Blinds will turn your Alfresco or balcony into another room in your home

Quality is Guaranteed

We guarantee you will be so impressed by the quality of our Café Blinds, as we only use Australian mechanisms, brackets, roller parts and Australian made fabrics.

Plus we have the largest fabric range in Perth including every Designer brand to choose from. Our fitters are the best in the business and our Merv, our Café blinds specialist knows his stuff.

Perth Eagle Blinds has 30 years of experience providing only the best premium products & we always ensure you will receive the best quality available.

So simple and quick to open and close, anyone can do it!

Easy-to-use Ziptrak® stops and stays in any position without locks using a special spring balance system. For extra ease of use, Ziptrak® is also available with remote operated electric motor, making a simple process even easier!

Endless Possibilities • Quality fabrics and materials allow you to use your outdoor areas all year round • Shade material or clear PVC! • Taut and Flat - ideal for signage!

All Weather Protection Ziptrak® has a solution for your home or business to guard against high winds, heat and sun as well as UV rays, and cold weather.

Environmentally Friendly Ziptrak® helps you cut down on energy use by keeping areas WARMER IN WINTER and COOLER IN SUMMER.

Continually pushing for new ways to stay 'green', Ziptrak®'s electric motors are optionally solar powered to help reduce your global footprint.

“Café blinds will change your outdoor living experience forever, our quotes are free & our quality is the best”

Quoted by Paul Assinder- Sales Director/Designer

Your Ziptrak® system can be motorised, and we are now additionally offering the amazingly simple and environmental SolarSmart™ automation solution for Ziptrak® blinds. SolarSmart™ is the most advanced green technology in solar powered outdoor blind automation in Australia. The SolarSmart™ system requires no hard wiring and is totally independent of mains power.

The SolarSmart™ system incorporates the sylphs Maxim Radio Transmitter and is available in both 1 Channel and 6 Channel options. Both transmitters are powered by a 3 Volt Lithium button battery.

- Completely solar powered
 - Cut down energy use
 - Reduce carbon footprint
 - Save on energy costs
 - No hard wiring
 - Fast and easy to install
 - No electricians required
 - Remote control operation
 - Save time and money
- Manufactured in Australia
