

uRemote ipad/iphone remote

Control your LUXAFLEX® Roller Blinds from your iPhone® or iPad®

Luxaflex Window Fashions and uRemote have combined to deliver a simple cost effective way of controlling your new Luxaflex Roller Blinds from a single screen on your existing Apple® portable device. Each blind location is daisy chained together, creating a network of blinds within the house. At the end of the daisy chain is the Luxaflex Automation Bridge and the uRemote control box.

An iPhone®, iPad® or iPod touch® communicates with the uRemote box via your home internet router**

You can control your blinds from outside the home - Remote control from outside of your house is possible when you have a home internet connection that is always on. Ask your uRemote specialist about configuring this option for you.

Control other devices in your house with the same uRemote technology, from your garage door to your lighting and more.

**Home internet router must be supplied by the customer.

Merger Remote for Luxaflex products

Merger is an affordable motorisation alternative for your roller blinds. There is an option for small narrow blinds, or larger single and linked blinds. You can control up to four blinds individually or more when operated as a group. Wall switch version also available.

What does the motor look like?

The motor of a Roller blind isn't seen on the finished product as its installed inside the blind. But heres a picture, seen above of the internal motor!

Acmeda Remote & Switch control

Acmeda is our Perth Design range choice of motor. Top quality Australian made. Option of remote control hardwired 240v, Battery operated motor which doesn't run on standard batteries and does need charging or hard wired wall switch as seen in the pic below. Switch and remote versions can also be linked to home automation systems.

Perth Eagle Blinds has 30 years of experience providing only the best premium products & we always ensure you will receive the best quality fabrics available.

Qmotion- Battery powered, remote controlled rollers moving so quietly you wont believe it

LUXAFLEX® Roller Blinds with Qmotion Technology were designed with a focus on reducing the total cost of motorisation for the home owner. It is the only super quiet battery operated blind on the market that offers batteries inside the roller tube. The result, is a perfectly balanced roller blind system using an integrated battery powered motor to operate the blind quietly and seamlessly.

Qmotion Technology offers a level of integrated motorisation never before seen in blinds.

Manual roller blinds you are making your life harder, motorized rollers will change the way you live in your home and office”

Quoted by Paul Assinder Sales /Designer

Hunter Douglas Remote

HDR is the Hunter Douglas system for automated Roller Blinds – created by the world’s leader in window furnishings.

The sleek Touch Sensitive remote control allows simple remote control as well as switch and automation control via an inbuilt switch connector.

The Hunter Douglas HDR is quiet, powered by an AC-240 volt motor. Switch operated version also available.

Somfy Remote

The Somfy RTS motors all feature a favourite position, allowing you to easily stop your blinds in the same position time after time. Setting your favourite position is easy, once done simply press the ‘MY’ button on your Somfy remote control. With a range of 200 metres in open space, or around 20 metres through two reinforced concrete walls, you can operate your Somfy motor from anywhere in the home. Wall switch version also available.
