

Roman blinds are the definition of Luxury living

Roman blinds come in several styles, and we offer a few versions. Cord lock controlled is our most popular version, easy to use, fast operation and child safe. Chain control is slower to open/close Roman blinds but can be a good option if you don't want cords; we use stainless steel chains, but also have the option of black or white plastic if you choose. Roman blinds come with the choice of a range of painted and stained timber battens, which run across the front and back of the blinds in Luxaflex Romans. Or you can choose aluminum battens in a range of painted colours when choosing from our Perth Design Roman range. The more popular no battens look is available in both Luxaflex and Perth Design versions. Roman blinds can come in all three types of fabric, Blockout to stop heat and light, Translucent/light filtering which lets in natural light, but stops heat and glare or Sheer, which you can see through during the day, but it stops some heat UV and glare. All have their advantages and its best to take advise from our experts before deciding.

Roman Blinds- Four styles in 2015

Beach® Roman Shades For over 20 years BEACH® Romans have continued to be a favourite and with their original canvas design, BEACH® Roman Shades are designed especially for those seeking a sleek and contemporary look.

Signature™ Roman Shades The SIGNATURE™ Roman Shades uses timber battens to create folds, adding texture, depth and style to your home.

Classique® Roman Shades With a contemporary look and feel, LUXAFLEX® CLASSIQUE™ Roman Shades incorporates a matching pelmet. This system uses a simple, elegant powder coated aluminum profile to create clean folds in the fabric.

Perth Design Roman Shades come either with or without Aluminum battens. They are hand made in Perth using all Australian made fabrics and are a great cost effective option for Roman Blinds.

Roman Blinds

Give your home a treat with the Roman blinds in the most amazing fabrics from our stylish range

Quality is Guaranteed

We guarantee you will be so impressed by the quality of our Roman Blinds, as we only use Australian mechanisms, brackets, parts and the very best Australian made fabrics.

Plus we have the largest fabric range in Perth including every Designer brand to choose from. Our fitters are the best in the business and our team knows everything there is to know about Romans.

Perth Eagle Blinds has over 32 years of experience providing only the best premium products & we always ensure you will receive the best quality available.

Roman blinds made to a much higher standard!

Luxaflex window fashions offer Top down bottom up version of Roman blinds too, see image on left. This can be perfect where you have a view but privacy issues with the same window. This is an exclusive product with a huge range of beautiful fabrics to choose from.

But Luxaflex can do even more with Roman blinds, the options are huge and the most advanced in the blinds industry globally.

See our full range of both Luxaflex and Perth design range of fabrics in store or you can view our Perth Design range on our website. www.perthblinds.com

“For the best Roman Blinds in Perth, you have to come to us! We can even make them work with a remote control”

Quoted by Paul Assinder- Sales Director/Designer

Forget the chains and cords

If you don't want to have any chains or cords to control your blinds, we can offer you Remote/Switch controlled Roman blinds.

Switch control Romans can either work from a switch wired into your home or through home automation, like C-Bus.

Remote controlled Romans work with a choice of Remote controls and motors inc. HD remote, Merger Acmeda or Somfy. All motors come with a 5-year warranty. Motorised Romans are made differently to a normal Roman blind as they roll on a roller tube when you press the button up/down rather than just folding up. Visit our showroom for more info.

Perth Design Motorised Romans can be controlled by Acmeda Remote control, which comes with either 1 or 15 channels remote. All motorised Romans require a licensed Electrician to install the molex cable prior to the installation of the blinds, as they run on 240V power.
