

## Shaped windows

**When it comes to shaped windows, it can be hard to find a window treatment to fit and once you find a solution can be costly. This page is available to advise you of your options with a shaped window.**

### Tinting your shaped window

If you have a shaped window in any shape, tinting is the cheapest solution. Tinting won't block out the light, but will stop some up to 70% heat and 99% UV and even some up to 93% of the glare.

See the picture below of NS10 a dark tint on an arched window.

**Pleated blinds by Verosol** Pleated blinds can be made in pretty much any window shape and some can even still be operated. They look good and can come in blackout sheer and translucent light filter

fabrics. Made of 100% Polyester and anti static to make them dust repellent, Verosols Pleated blinds are a perfect solution. They can be custom made to fit arches, triangle shaped windows or normal square or rectangle windows too of course.

### Face Fitted

You can of course have any blind fitted above or over the top of a shaped window, which would cost less to manufacture but not look anywhere near as nice.

# Shaped window solutions

# Quality is Guaranteed

All our products except Shutters are Australian made and we only use Australian parts and mechanisms for our blinds so we can guarantee quality products.

Plus our Installers are fully trained and have been fitting blinds for up to 25 years so you can expect a great job every time.

Perth Eagle Blinds has 31 years of experience providing only the best premium products & we always ensure you will receive the best quality blinds available.

## Shaped Shutters

Shutters are the most durable and arguably best looking window treatment available. Made of solid timber or poly resin with frame work round the entire shutter, they can be custom made to fit nearly any shaped window. Some shaped shutters can even still have movable blades to open and close as well as hinges to open it.

Shutters are the no.1 product for the perfect finish on your arched or shaped window.

*“If you have a complicated window or shaped window, the team at Perth Eagle Blinds have the experience to cover it for you”*

Quoted by Paul Assinder- Sales Director/Designer

## Shaped Rollers

You could even buy shaped Roller blinds, this is an uncommon option but is possible.

As seen in the picture to the right, Rollers made to fit an angled window is possible, but the blinds would be void of warranty and will roll up unevenly as seen in the picture below.

## Vertical blinds on an angle

We have been making Vertical blinds since 1983 so making them for an angled window is no problem for us. They cannot be made for arched windows, or triangle windows, but sloping windows are not a problem, as seen in the picture on left.
