

## Matrix Tinting

The soft, neutral tone of Matrix does not alter the natural appearance of windows and is a popular choice for home and building owners that desire a subtle window treatment. Available in a range of densities that provide varying levels of performance and solution options.

Empowered by a revolutionary manufacturing process, Matrix features advanced plasma ceramics. Technology that produces solar control performance equal to conventional metallised films without the harsh mirror look while delivering supreme optical clarity that preserves natural room ambience. Matrix advanced ceramic is signal friendly and will not interfere with Wi-Fi or mobile phone reception. It is non-fading, non-corrosive in coastal areas and will provide extreme durability for many years of solar control performance and thermal protection.

## Harmony Window Tinting

Harmony emulates the look of expensive tinted glass with a soft natural tone; minimal reflectivity and additionally offers enhanced solar control benefits.

During the day, Harmony provides outdoor privacy and a warm indoor ambience that is ideal for glass areas where maximum glare and fading control is a desired requirement. In the evening, Harmony's anti-glare carbon coating reduces annoying back reflections and maintains clarity to scenic views.

Harmony's proprietary alloy construction is Wi-Fi friendly and delivers strong summer heat rejection, combined with excellent UV Ray and fading protection. Harmony films are resistant to colour fade and optical distortion, offering many years of enjoyment and protection.

Perth Eagle Blinds has over 32 years of experience providing only the best premium products & we always ensure you will receive the best quality available.

## Synergy Tinting

Synergy is an attractive solution for large expanses of unprotected glass that require superior heat reduction. Designed with a high reflective metal coating for maximum solar heat rejection that is dual purpose matched to a non-reflective, internal layer. This reduces glare and back reflection and is perfect for spacious interiors with strong day or night lighting.

Available in a range of density options, all with low levels of heat absorbance. Synergy is compatible with dual pane windows and is the ideal choice for areas where thermal stress is also a major consideration. Synergy's deep colour tone preserves your natural outlook and particularly enhances blue sky's, cityscape, water and sea views alike.

“You can trust Perth Eagle Tinting to tint your home or business with only the best tinting film from around the world!”

Quoted by Paul Assinder- Sales Director/Designer

## Security Film & Safety Film

Having Security film installed onto the windows of your home or business will give the piece of mind that robbers cant smash their way into your property. Security Film holds the glass together so when impacted the glass will break but unlike normal windows it will stay in one piece and make a lot of noise and take lots of impacts before anyone can get through it. Safety film is also available, although its not going to stop robbers it does make your doors or windows safe from shattering, as it will hold the glass together. Safety film is perfect for childcare Centre's or for sliding doors at your home. Both films also stop 99% Ultra Violet rays.

## Decorative vinyl window films

Australia's most popular range of simulated etch, sandblast, frosted, diffuser and opaque glass films, produced by only the industry leading vinyl film and adhesive manufacturers, these films out perform and outlast all other vinyl films on the market.

These products are easy to use and affordably priced. DecoGlass vinyl window films offers a range of high quality decorative window films to supply the large demand for residential and commercial glass frosting. These films have a diverse range of uses, from the small bathroom window that requires privacy whilst still allowing the natural light to enter the room, to the larger internal glass partition walls separating internal office spaces where a level of privacy is required.
