

Why use Verosol?

At Verosol, we take great pride in offering a range of the highest quality blinds and shutters available in the market today. Our exacting standards and use of the best raw materials available mean that performance and longevity are ensured. This is supported by our 5 year warranty on all products. Verosol is the leader when it comes to solar control, so if you are suffering problems relating to heat or glare from the sun, make sure you investigate our metal back fabric blinds such as SilverScreen. You'll also find that this solution provides increased UV protection for your furnishings but still allows you to maintain views through your window.

Verosol also offers you an exhaustive range of over 300 different fabric designs and 40 different models to suit any window configuration. Our hand crafted timber shutters and blinds are the choice for the most discerning customers and we can customise paint colours and stains to your exact needs. And, for the ultimate convenience and prestige, Verosol provides a comprehensive range of remote control blinds that can be linked to sun sensors or home automation systems alike.

Verosol's pleated blinds are available in a wide range of colour and fabric densities. The head and base rails can either be colour co-ordinated with the fabric or clear anodised to compliment contemporary interiors

The Fabric Ranges available are totally exclusive to Verosol- heres info on some...

Original 982 is a polyester blackout fabric with a metal backing that provides total privacy and room darkening. Providing excellent protection against Summer heat and superb insulation in Winter. Woven to 2200mm, 982 is perfectly designed for pleated and roller blind products, especially in twin or motorised applications where room darkening or total privacy is desirable.

Original 812 is a semi transparent metal backed fabric woven from 100% PES Trevira CS and is inherently flame retardant. 812 offers high performance which is independent of the colour selected. Combining good visual contact through the window and excellent glare control, 812 provides heat control during Summer and good insulation in Winter. Woven to 2200mm, 812 is perfectly designed for pleated and roller blind products, especially in twin or motorised applications.

Original 816 is a highly transparent metal backed fabric woven from 100% PES Trevira CS and is inherently flame retardant. 816 offers excellent performance, which is independent of the colour selected by combining excellent vision out with heat control and insulation for comfort all year round. Woven to 2200mm, 816 is perfectly designed for pleated and roller blind products, especially in twin or motorised applications.

Original 878 is a non-transparent metal backed fabric woven from 100% PES Trevira CS and is inherently flame retardant. 878 offers excellent performance which is independent of the colour selected. The benefits of this fabric are in its excellent heat and glare control with good insulation against heat loss during Winter months. Woven to 2200mm, 878 is perfectly designed for pleated and roller blind products, especially in twin or motorised applications

A totally different Fabric range!

VeroCell's unique cellular design offers a high performance blackout fabric. With no visible holes VeroCell is the perfect fabric for those rooms where room darkening is required, such as bedrooms and theatre rooms. VeroCell is available at a maximum width of 3000mm and maximum drop of 2700mm.
