

## We make the best Vertical blinds

Our Verticals are manufactured here in Perth in 89mm or 127mm fabric slats. 89mm cost 20% more than 127mm, as the blind will use 20% more fabric & carriers etc. The tracks come in a choice of four colours including white, magnolia, black and anotec grey and we insert a strip of fabric to match the fabric being used for the vertical slats.

We only use the best quality parts for our vertical blinds and we've been manufacturing them in Wangara for over 33 years.

There is two-control options- Wand control being the most popular and easy to use, clean and child safe. Chain control is the other option, which is the best control system for verticals to open from the center or bunch in the center by pulling just one cord. They can also go just left or right and the cord is tensioned against the wall for child safety. The cord control has a self-aligner too so with an extra pull on the cord it realigns the slats. Verticals can be made up to 3600mm wide and can be made longer than 3000mm high. We use quality carriers that make taking slats off to clean so easy.

The chain control option also has a self-aligner built in so the blind can be straightened up. Our Vertical Blinds are made at our factory in Wangara and are 100% Australian made with top quality parts.

The advantage of Verticals is how diverse they are, we can make them to fit angled windows, bay windows or corner windows.

## Our Fabric makes all the difference

We only use quality Australian made fabrics like Shaw Vibe, Elegance and even Wilson textured fabrics for example. Our vertical blinds fabrics are all made of polyester and are stain and mould resistant. All our Vertical blinds fabrics manufactured in Perth are blackout, although we can also order light filtering Verticals fabrics from Luxaflex for you, but you would also have to use their brackets too.

Our entire range of fabrics are PVC free and come with either chains to link them, chainless weights or for a small surcharge sewn in weights. We are able to email you our vertical color brochures as per the example on the left. Verticals can also come with an optional 89mm pelmet, which attaches to the Vertical blinds bracket. The pelmets can be made to fit on corner windows too. They come with a fabric insert to match the fabric of your blinds.

“Verticals are still the most cost effective option when buying blinds & with our new fabrics they look better than ever!”

Quoted by Paul Assinder - Sales Director/Designer

## We also sell Luxaflex Verticals

LUXAFLEX® Vertical Blinds control heat and light in a sleek modern design, which incorporates the Ultimate Track System. Vertical blinds are available in translucent and block-out fabrics in a huge variety of colours. LUXAFLEX vertical blinds

Add a fresh new dimension to a traditional window fashion. There are two different operating styles available for Vertical Blinds. Choose from either cord operation or wand operation, wand is more popular as its easy to use and easy to clean too. Wands are available in pure white or anodised grey.

Luxaflex Still offer three slat sizes too, 127mm slats, 89mm or 100mm. making it easier to suit your home. Choose from chainless weights (not sewn in) or weights and chains at the bottom of your blinds.

LUXAFLEX® Vertical Blinds come in not only blackout fabrics, but some very contemporary Translucent fabrics too. Plus you can match up your vertical blinds by Luxaflex with your Luxaflex Roller blinds. Make sliding doors stylish as well as conveniently functional by using translucent vertical blinds, letting natural light in, but stopping heat and UV and still totally private from inside.
